Why we choose ADONIS?

ADONIS offered a comprehensive BPM and BPA tool with multiple easy to use features which allowed efficient documentation and maintenance of Core Business Processes

We were looking for a new Business Process Management & Analysis tool having below capabilities..

**Web-Based
Modelling**

**In-Built Process
Governance**

User Friendly

**Analysis &
Reporting**

Cataloging

**Easy
Integration**

Alignment with ADONIS

- ✓ *BOC-ADONIS met above requirements and offered web-based modelling tool following BPMN 2.0 standards*
- ✓ *With strategic phased deployment approach, the solution was implemented with an aim to pick up the requirements based on priority*
- ✓ *BOC offered User Training sessions and User Guides to ensure effective adoption of the tool within the organization*

Why we choose ADOIT ?

ADOIT offered compatibility, customizability, ease of use, and SaaS environment. Moreover, helped in achieving net-zero landscape.

We were looking for a new Enterprise Architecture tool having below capabilities..

Automated and custom reporting with dashboard capabilities

Easy Integration with Organizational standard tools

Cloud enabled GxP compliant SaaS solution (scalable, flexible & customizable)

Alignment with ADOIT

Scalable Cloud-Based Solution

Easy Integration (with 3rd party tools)

Offers GxP Compliant Platform

Out Of The Box As Default

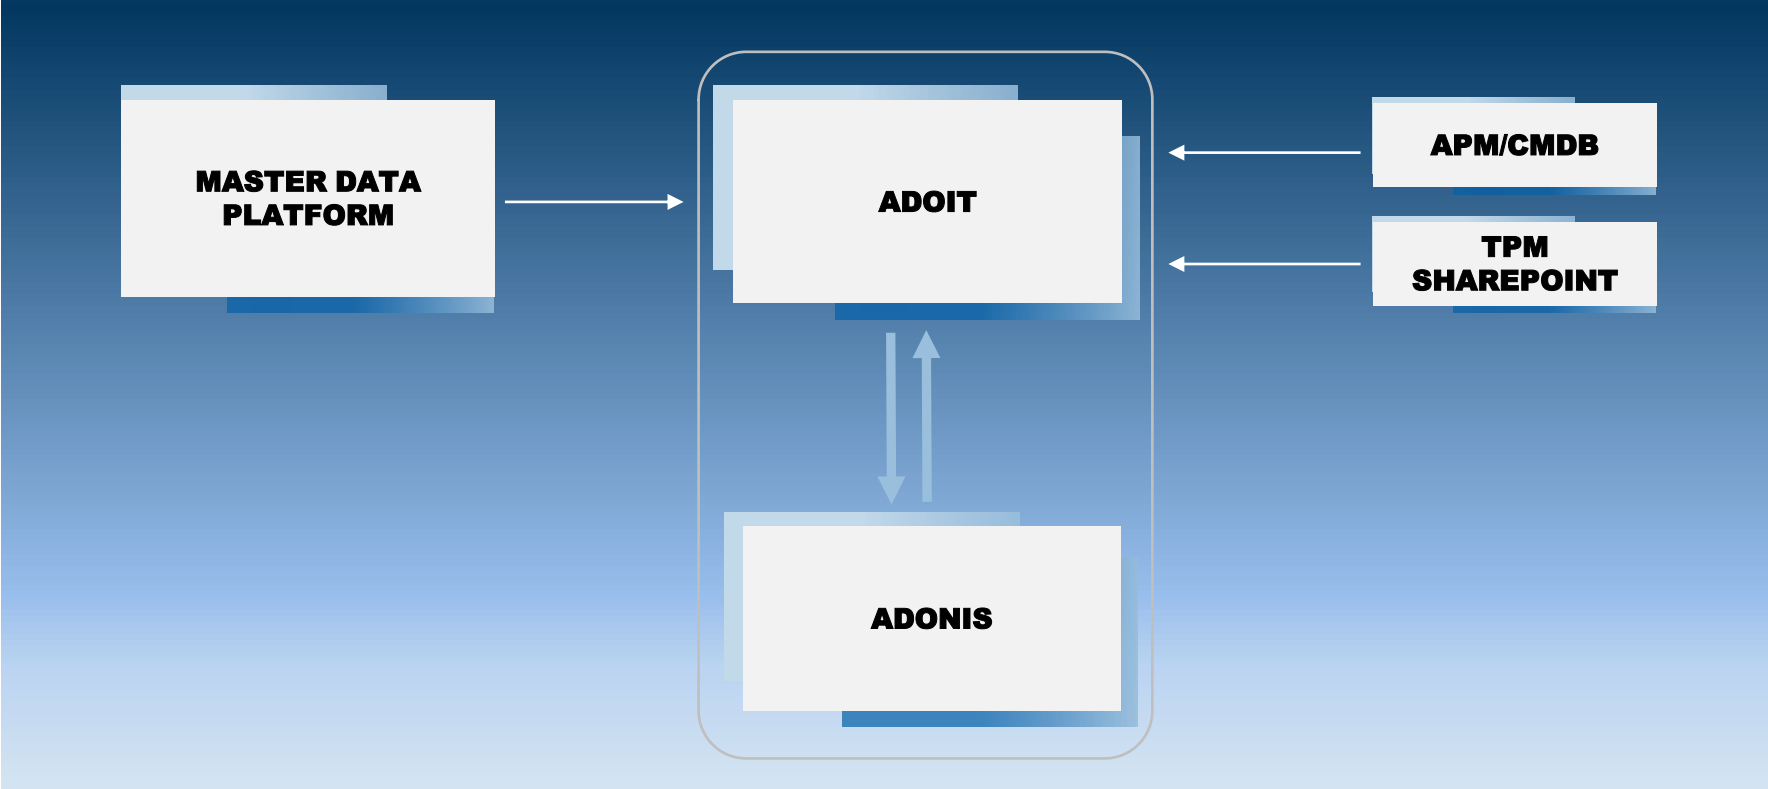

Easy To Use

Multiple User Personas Available

CONNECTED ECOSYSTEM AT NOVARTIS

We have created value by establishing integrations between EA platform and other source systems thereby building a well-connected ecosystem

DIGITAL TRANSFORMATION INITIATIVES WITH ADONIS & ADOIT

DIGITAL TRANSFORMATION WITH ADOIT

Leveraging ADOIT to support large transformation programs within the organization

BUSINESS OBJECTIVE

- Accessibility of information to support key business decisions
- Clear understanding and documentation of Business & IT portfolio
- Highlight cross functional impacts
- Trace redundancy

APPROACH

- Data Quality is the key. Ensuring reviewed & validated data is captured
- Creating various viewpoints to cater the needs of business by building different types of report
- Providing guidelines on types of relationship for an object to between two objects
- Providing guidelines on various types of model

BENEFITS

- Common understanding of architecture development practice
- Reduced learning curve
- Improved Data Quality

DIGITAL TRANSFORMATION WITH ADONIS

Adoption of ADONIS for one of the largest Business Transformation Program within the organization

BUSINESS OBJECTIVE

- Largest business transformation program of Novartis needed a solution to onboard business processes along with supporting artifacts
- Implement a single platform in the organization where all the business processes across functions can be onboarded

APPROACH

- Baselined As-Is Processes across various business
- Worked with business stakeholders to further refine the As-Is process and arrive at the To-Be processes
- Mapped metadata elements (roles, applications) to the process models

BENEFITS

- With in-built BPMN 2.0 modelling conventions, ADONIS helped in establishing a standard process to model core business processes across functions
- Established interlinkages between cross-functional processes
- ADONIS served as a one-stop solution for all the process related information (Documents, Training Material, Applications, Roles, Risk & Control, SOP's)

PLAN AHEAD
